Research Evaluation Questionnaire

INTRODUCTION

In Glasgow City Council Education Services there is a policy of evaluating all requests for research access made to the department or any section of it.

This is intended to co-ordinate and organise research proposed or being carried out within Education Services. This will also avoid any excessive demands on staff resources and ensure the protection of client confidentiality.

In order to reach a decision regarding your request for access we need information on your proposal. This should be provided in the questionnaire attached. Please provide as much detail as possible and include all relevant supporting documentation, such as questionnaires, focus group questions, parent and pupil consent forms and any other additional information relating to the research.

Please refer to **Appendix 1: Education Services Research Evaluation Criteria** for further information and guidance on the process.

There is also a leaflet available entitled “**Get Your Facts Right**” produced by pupils from a local secondary school, which is a guide to involving young people in social research. This can be found online alongside this application form or can be requested from the Performance, Planning and Research Team.

We apologise if any of the information this form requires duplicates information given in your initial approach to the department but would assure you that your co-operation in this will assist us in arriving at a speedier conclusion.

THE PROCEDURE

On receipt of your completed application, your proposal will be considered by the Education Services Research Group (ESRG) where a recommendation will be made. You will then be informed as soon as possible thereafter of the decision.

Researchers must not approach schools to participate in a research project until an application has been made and appropriate approval has been granted by the Education Services Research Group.

Please return your completed questionnaire and address any queries to:
