

# Commercial Waste and Recycling

Glasgow City Council operates the largest commercial waste disposal operation in Glasgow, providing an unparalleled commercial waste service to businesses throughout the City.

With eight local depots and a dedicated fleet of vehicles, we can offer multiple collection times per day to suit your business needs and we can provide collections for:

- Glass
- Metal
- Plastic
- Paper
- Card
- Food Waste
- Residual Waste

Our experienced Customer Liaison team will also ensure your requirements are met. Our pricing is all-inclusive and unlike many operators the price you are quoted is the price you will pay. There are no hidden extras or add-ons and all our revenue is reinvested into enhancing Glasgow's frontline services.

We offer a variety of ways to collect your commercial waste. Our main products and services are highlighted below. However if your requirements are more bespoke our Sales Executives can work with you to create a tailored package.

## bins and waste sacks

We know that every business is different so with this in mind, we offer a range of bin sizes from 240 to 1280 litres and, if you are limited for space, we can provide trade waste sacks instead. So, no matter how big or small your business, we have a solution that can meet your needs.

## skips and containers

Skips and containers are a clean, cost effective on-site solution ideally suited for higher volume commercial and industrial waste. Whether you need a regular contract or just occasional use, we can provide the right container or compactor at a competitive price.

## recycling

Our recycling service can offer many benefits to your business.

It is simple and easy to use and we can provide support to help encourage employees to recycle. We can also help to increase recycling and recovery rates enabling you to meet your environmental commitments as well as ensuring that you comply with regulations and your Duty of Care.

New legislation takes effect in January 2014 which includes a requirement for all businesses to segregate their waste by type, including food waste.

We have invested significantly in equipment and people in order to support the introduction of a total waste disposal service which caters for all waste types including glass, paper, cardboard, plastics, and electrical goods, and from July 2013 we have started to roll out food waste collections.

By late 2015, when the new residual waste treatment plant opens we will divert over 90% of waste from landfill.

By choosing Glasgow City Council as your waste service provider, you will be dealing with a responsible operator who complies with all legislation. We also provide a consultancy service that can advise on upcoming legislation and help your business meet your waste targets.

Our customer care centre is available 24/7, 365 days of the year to take your call. For further details of this service or any of our commercial services please contact us.
