

Dear Resident

Glasgow City Council is providing you with a new food waste recycling service for all your cooked and uncooked food waste - including leftovers, egg shells, tea bags and bones. This letter contains information about this new service including how the service works and what types of food waste you can recycle.

Benefits of recycling food waste

Everyone has food waste and even small amounts make a difference when they are recycled. Diverting food waste from landfill means it can be recycled and turned into valuable resources such as agricultural fertilisers and energy.

Information about your NEW food waste recycling service

Within the next two weeks an indoor caddy will be delivered to your property along with a supply of FREE caddy liners. We will also provide a communal back court bin for the safe and clean disposal of your bagged food waste. You will also receive a leaflet that clearly explains how to use this new service.

How to use your new food waste recycling service

1 Put one of the compostable liners into your indoor caddy

2 Transfer any cooked or uncooked food waste to the caddy

3 When the liner is almost full, tie and remove it. Replace with a new liner

4 Place the full liner into the communal food waste bin located outside

5 We will empty the communal food waste bin every week

Your weekly collection

You can start recycling your food waste as soon as you receive your indoor caddy and liners. We will empty the back court food waste bin every week.

Reminder

Once you have received your caddy and liners, food waste should no longer be placed in your general waste bin.

Further Information

If you have any questions or require any further information please visit
 www.glasgow.gov.uk/recycling.

Yours faithfully

Brian Devlin
