

# South City Way

The forthcoming South City Way will deliver a safer, more attractive, comfortable walking and cycling route between Queen's Park and the City Centre. The 3 km corridor will support and enhance ongoing regeneration of the surrounding area, promoting active and sustainable travel.

Development of the route will provide links to a network of existing walking and cycle routes spanning the city and surrounding areas, serving: parks, medical centres, shops, academic, leisure and cultural establishments along and close to the core route helping make walking and cycling the most convenient modes of transport over short distances.

Reinvigorated streets will provide an urban area that does not rely on the car as the primary form of transport, resulting in reduced air pollution, improved air quality, and improved health.

Glasgow's "City Ways" are routes that radiate from the city centre. These key walking and cycling corridors link into the wider network and are characterised by features such as greater pedestrian space and segregated cycle lanes. With business, cultural, educational and residential destinations in close proximity, the routes provide greater access to all aspects of our city.
