

## Games Village - District Heating Price Tracker

### January - March 2015 (Benchmark - 16 January 2015)

| Supplier             | Gas Unit Rate<br>£ / kWh | Annual Standing Charge<br>£ | Boiler Annual Service Plan<br>£ |
|----------------------|--------------------------|-----------------------------|---------------------------------|
| Scottish Hydro       | 0.04200                  | 57.17                       | 136.80                          |
| British Gas          | 0.04280                  | 90.41                       | 114.00                          |
| Scottish Power       | 0.03933                  | 95.23                       | 189.60                          |
| npower               | 0.04181                  | 50.01                       | 174.00                          |
| <b>Average</b>       | <b>0.04149</b>           | <b>73.21</b>                | <b>153.60</b>                   |
| Supplier             | Heat Unit Rate           | Standing Charge             | Maintenance Charge              |
| Glasgow City Council | £0.04563/kWh             | £73.21/yr (£0.20056/day)    | £153.60/yr (£0.42082/day)       |

Note: The energy consumption in kWh calculated from the gas meter for a home heated by a modern, efficient gas boiler does not correspond directly to the energy consumption in kWh seen on the heat meter. This difference is caused by the gas meter recording energy before the gas boiler where at least 10% of the energy is lost in converting gas into heat and hot water. For the district heating system, these losses occur at the Energy Centre and therefore the heat meter records the actual energy you have used to heat your home and provide hot water. To calculate the cost of the heat and water you have used, the heat tariff charge in £/kWh is calculated as 10% greater than the benchmarked gas tariff charge, equivalent to multiplying the gas unit rate by 1.1.

### April - June 2015 (Benchmark - 2 April 2015)

| Supplier             | Gas Unit Rate<br>£ / kWh | Annual Standing Charge<br>£ | Boiler Annual Service Plan<br>£ |
|----------------------|--------------------------|-----------------------------|---------------------------------|
| Scottish Hydro       | 0.04200                  | 57.16                       | 202.80                          |
| British Gas          | 0.04020                  | 90.41                       | 102.00                          |
| Scottish Power       | 0.03702                  | 95.23                       | 189.60                          |
| npower               | 0.03939                  | 50.01                       | 174.00                          |
| <b>Average</b>       | <b>0.03965</b>           | <b>73.20</b>                | <b>167.10</b>                   |
| Supplier             | Heat Unit Rate           | Standing Charge             | Maintenance Charge              |
| Glasgow City Council | £0.04362/kWh             | £73.20/yr (£0.20055/day)    | £167.10/yr (£0.45781/day)       |

### July - September 2015 (Benchmark - 26 June 2015 )
