Artists Impression of the Sighthill Campus

Dear Resident,

As you may be aware City Building are constructing Sighthill Community Campus which will incorporate 2 education establishments, a nursery and a Youth Centre. The new campus is currently being built on a vacant site near Fountainwell Drive.

City Building

City Building is one of Scotland's largest construction companies with 2200 employees throughout the services areas. Our award winning training academies in Queenslie and Laurieston are the most successful apprenticeship training centres in Scotland. We also operate Royal Strathclyde Blind Industries (RSBi), which is one of the best supported employment facilities in Europe, which has over 240 employees most of whom have a disability.

During the construction of the school, many of the apprentices on site will be former pupils from schools in the North/East area of Glasgow and many of the fixtures and fittings will be manufactured and supplied by RSBi.

Initial Phase of Works

Main construction will commence in October 2017 and it is planned that construction works will be complete late Summer 2019. Over the coming weeks, site activities will focus on the initial site set up, with the continuation of concrete foundations, structural steel frame and fire protection to steelwork, metal floor decking and the erection of Scaffold and Timber frame structures.

The site at Sighthill Community Campus has been registered with the Considerate Constructors Scheme.

This scheme has been established to promote good working relationships between Contractors and their surrounding environment and the local residents.

During our time working in your neighbourhood, City Building will endeavour to minimise the impact the building site has on your community.

The normal working hours on the building site:

Monday to Friday 8.00am to 4.30pm
Saturday 8.00am to 1.00pm.

Minimising Disruption

Construction operations can, of course, be unavoidably disruptive. However, we would like to assure everyone that we will do our utmost to minimise any disruption to residents and by working together with you, we hope to complete the new school campus with as little inconvenience as possible.

It is a legal requirement to provide a safe working environment for everyone working on the site and that extends to the general public within the vicinity of the works. As you will appreciate, construction sites can be dangerous places and the safety of all persons is paramount. To that end, security boundary fence will be maintained around the site perimeter to keep the public safe from construction works. We would appreciate if you could extend this important message to your families, friends and neighbours, highlighting the dangers.

Our Construction Team

Our construction team look forward to the successful construction of the new Sighthill Community Campus. The project will prove an excellent opportunity for our Apprentices and Trainees to utilise their skills and develop a career in construction.

We intend to keep you informed of further developments and site activities through our newsletters.

However, if you would like to discuss any matters relating to the project, please do not hesitate to contact City Building through the email address or phone number below.
