

#	Date Submitted	Why do you support this project?	Other suggestions / comments / messages of support
1706	26/08/2019	grow-more	Great to hear Locavore pioneering more urban agriculture- I look forward to being able to case study the model and lessons learned to other local authorities.
1705	25/08/2019	volunteer, grow-more	My address changed. But I still live local and would like to volunteer. I'd no idea that bit of land was lying unused - disgrace. This is a great idea. Good luck with all the negotiations - surely it's a 'no-brainer'????
1704	23/08/2019	grow-more	
1703	23/08/2019	grow-more, dtg	delighted that the site is going to be used in this way. Not everyone wants a full allotment and this offers growing space and teaching together. an excellent idea
1699	19/08/2019	grow-more, volunteer	This sounds like such an exciting project and I would love to get involved and volunteer!
1691	13/08/2019	grow-more	This is a great idea. Good luck!
1689	12/08/2019	grow-more	I am pledging support on a personal level, but also work for an environmental charity that may be able to offer support in the future. Urban growing projects like this (especially when they have a degree of scale and include protected cropping) have an enormous capacity not just to add to the range and volume of local produce but to build significant community participation and also create good jobs. Transferring this asset into community ownership and management can unlock a huge potential for social enterprise, food education, green prescribing, horticulture training and much more. As Locavore have demonstrated already, local food can reach beyond the traditional veg box and restaurant market to support dignity and choice in community food activities. This project exemplifies the Good Food Nation agenda and Nourish is fully in support. Good luck Two of my children live nearby with their families and we are through here often. Would love to see how this goes and maybe try to coo/extend to our home town of Stirling. Forest School and nursery - Conscious food - cooking Coffee shop with natural childrens play area
1688	11/08/2019	grow-more	
1679	10/08/2019	grow-more	
1675	01/08/2019	grow-more	I live locally and have only recently found out about Locavore. I might be interested in volunteering and taking part in Grow the Growers but don't know too much about it yet. It would be great to get some grain experiments happening in the West of Scotland...we are sorely lacking in this area when you compare it with the landrace varieties currently being grown in the East.
1672	31/07/2019	grow-more, dtg	
1661	19/07/2019	grow-more	
1656	12/07/2019	grow-more, business, dtg	This development will bring together community food businesses and growers, community groups, individuals, schools and others and could be one of the most exciting community food developments in Glasgow for some time. I have no doubt that it will have an enormous benefit to the local population, providing employment opportunities and apprenticeships, training and volunteering opportunities, and delivering positive impacts in terms of health and nutrition, community resilience and wellbeing. The Real Farming Trust works with and supports community-based enterprises and projects up and down the country, and rarely comes across collaborative projects on this scale with such ambition and the potential to deliver such impact to the local population. By supporting this development at Bellahouston, Glasgow City Council has the opportunity to show its commitment to healthy and nutritious food, and put Glasgow firmly on the map as a sustainable food city. I urge it to support Locavore's application to develop and manage this site as a vibrant food hub for the benefit of the local community for generations to come.
1654	09/07/2019	grow-more	As a project that is very closely aligned with our own values and our charitable goals and objectives, we are delighted to pledge our support for this development and will be supporting Locavore with its plans over the coming months and years. Forth Environment Link is an environmental charity that engages communities across the Forth Valley and selected rural areas of Scotland in behavioural change for outcomes that are better for people and planet. Locavore currently supplies one of our Food & Growing projects, Stirling NeighbourFood, with fresh seasonal vegetables, much of it grown themselves already. An expansion in its capacity to provide more volume and variety of local produce throughout the growing season would be very welcome. That it plans to do so in a way that addresses social justice in the wider food system by 'growing growers' and providing further opportunities for upskilling local people chimes with our own ethos. We fully support this venture and wish Locavore CIC every success in securing community use of the site at Bellahouston.
1653	09/07/2019	grow-more, visit	
1650	08/07/2019	grow-more	
1647	06/07/2019	grow-more	This is a great idea and everyone locally benefits from it in so many ways. not least making good quality food available locally and minimum packaging I would love for my children to learn more than I know about how to grow vegetables.
1628	01/07/2019	grow-more, volunteer, dtg	I would love more sustainable and local food options and to be able to help educate my children about sustainable food This sounds like a fantastic idea for the local area and the wider communities of Glasgow. As a local resident with a young family, we use Bellahouston park regularly and this would be a wonderful addition. Currently it appears to be an unused space. The benefits to the environment and the physical and mental wellbeing of volunteers/staff/users could be enormous. As a space for learning and training it could also be a great resource. I am a healthcare professional in the field of mental health and recognize the potential life changing benefits of involvement in a project such as this. Great work!
1616	01/07/2019	grow-more, volunteer, dtg	
1614	30/06/2019	grow-more	Good luck I just moved into town and I am only a postgrad student (aka, limited means) but I thoroughly support your activities and would like to help/participate in any way I can. I have had reasonable experience with permaculture/natural farming projects and maintained a small garden of my own. By profession, I am an architect and designer. If by actual hand work on the field (which I miss) or by design work (posters/leaflets/etc or plans/maps/construction details,etc) I can participate, please let me know! Also, I have my DSLR with me for photo coverage. Thank you!
1613	30/06/2019	grow-more, volunteer	best wishes, "
1608	26/06/2019	grow-more, dtg	Go for it. Sounds great! Good luck! I'm looking to produce food with locally sourced and seasonal produce. In supporting this development we would look to buy daily supplies and twice weekly larger orders for pre-prep for our seitan.
1605	24/06/2019	grow-more	great idea
1601	22/06/2019	grow-more	I wish the project well
1593	17/06/2019	grow-more, volunteer, dtg, visit	Very interested in helping in any way I can do I will look for opportunities which arise to volunteer
1592	17/06/2019	grow-more, volunteer, dtg, business	Good luck
1589	16/06/2019	grow-more	That's the only way forward! Thank you and all the best!
1587	15/06/2019	grow-more	Would be great to be able to buy more local produce and to have the site used again.
1586	15/06/2019	volunteer, dtg	I am interested in small plots for beginners This is a fantastic opportunity to bring Glasgow closer to being a city with a sustainable food system! I am deeply passionate about this aim and I wish you the best of luck with this project. I would like to bring my skills to the table and hope this is something that I can be a part of. I am a community gardener who has worked in SIMD areas in Glasgow for the past 3 and a half years. Prior to this I volunteered on Holy Isle as a gardener for 2 years. I worked as part of a team of 3 who utilised the help of volunteers to maintain a productive kitchen garden that fed the many guests coming through the retreat centre. There were at times 70 + guests so we had to ensure that the garden was productive. The food was something which many of the guests regarded as a significant draw to the island. I would like to create a sustainable social enterprise that grows quality organic produce that can be sold to local businesses (preferably also with a social aspect). This would fund production of fruit and vegetables for communities living in areas of multiple deprivations and would also be contributed to by a volunteer workforce. This project would be maintained by a team of gardeners who can work with and manage volunteers in a way that ensures that the enterprise can function in a professional way. If this is something that fits in with your plans and principles please do get in touch. All the best,
1583	13/06/2019	grow-more, visit, business	
1582	13/06/2019	grow-more, volunteer, business	This is a great project with many awesome possibilities. Not least of which to increase the supply of locally grown organic produce for Glaswegians and to get more people involved in this work and engaged in their food production.
1576	11/06/2019	grow-more, volunteer, dtg	I already have two raised beds in my garden and I'm growing Pak Choi, Beetroot, Chives and Parsnips this year. I work full-time as a Nurse Practitioner and teach part-time, so my time is, unfortunately, limited, but, I'm vevy interth inthis project in my neighbourhood !
1574	11/06/2019	grow-more, visit	Great stuff! A real step forward for urban food growing in Glasgow!

pledge-support-for-locavores-be

1570	10/06/2019	grow-more	I am so pleased that Locavore might have a chance to expand further and make use of this site! I really hope it happens! I can't believe this place has not been used for growing local veg sooner. I wholeheartedly support Locavore in their efforts to turn it into a productive food growing hub. Great initiative to get local people involved and set an example of urban farming for other cities, too.
1567	10/06/2019	grow-more,volunteer,gtg	This is incredible! I would love to be a part of this - so necessary and important to learn more about sustainability and produce!
1559	07/06/2019	grow-more,volunteer	Wonderful idea, good luck with the transfer.
1558	07/06/2019	grow-more,volunteer,dtg,business	The best of Scottish luck, folks.
1554	07/06/2019	grow-more	Keep up the great work you are doing, it's inspirational. This will be great for this area.
1552	07/06/2019	grow-more,volunteer	St Paul's Youth Forum sees upscaling urban food growing as an intrinsic part of creating a sustainable local food system for Glasgow, and we would be delighted to work with Locavore on this project should the opportunity arise e.g. work placement for people we support.
1543	05/06/2019	grow-more,visit,business	This is a fabulous project for Glasgow!
1542	05/06/2019	grow-more,visit,business,volunteer,dtg	Wishing you success!
1539	05/06/2019	grow-more,volunteer	This would be great addition to all that great work local groups are doing to make Glasgow sustainable.
1538	05/06/2019	grow-more,volunteer,dtg	I think this is a fantastic idea and I fully support it.
1532	04/06/2019	gtg,grow-more	Keep up local food growing it's great!!
1530	04/06/2019	grow-more	Fabulous plan and I am right behind you!
1528	04/06/2019	grow-more,gtg,visit,business	All the very best, Bellahouston Nursery is an exciting example of disused land could be regenerated in an urban environment. Systemically, we need more food produced locally and this is a real opportunity to create a vibrant place to do so. One of the many challenges will be to re-build soil and re-inject life in an a location where it has been gravelled and paved over. If Locavore can successfully do this and re-create healthy, nutrient rich, ecologically diverse soil to grow in, then it will be a beneficial model for other urban environments to take inspiration from too.
1521	03/06/2019	grow-more	This is a little bit far for my family to access regularly but I think it is something that is much needed.
1520	03/06/2019	grow-more	I work with adults learning English and see potential for this group to learn English while growing food. I have a background in Community Learning and development. Previously taught work place learning courses for an FE College. Currently employed 10hrs as Community Development Officer for an OSC Forest School in Glasgow (Social Enterprise). This is a Scandinavian approach to outdoor learning through play, Outdoors, all weather, in local woodland. Presently, we are re locating to another woodland and looking to build capacity. I keep hens, grow my own veg, herbs and fruit organically, and am passionate about teaching people healthy eating on a budget, I am passionate about cooking, and love sharing these skills with others. I would love to arrange a visit,
1519	03/06/2019	grow-more,gtg,visit,business	Many thanks
1517	03/06/2019	grow-more	As an allotmenter I realise the benefits of growing food - well being as well as good food. Great initiative, wish you success and that you build a thriving community
1511	03/06/2019	grow-more,volunteer	I endorse Locavore's plans for the site. It is a brilliant idea and needed as we go into the future. Glasgow can be at the forefront of food growing innovation and make the council proud to champion this through projects like Bellahouston. I ask GCC to give Locavore their full support in establishing this project in the southside of the city.
1508	03/06/2019	grow-more	Sounds like an amazing project!
1501	02/06/2019	grow-more,volunteer	Great idea! When I was a city councillor I tried to get something like this going but each potential partner fell by the wayside, so I am thrilled that the time has come for this idea to happen and for Locavore to make it work. There must be loads of other useless council land that could be put to similar uses.
1498	02/06/2019	grow-more	This proposal will help build sustainable fairer local food in Glasgow as well as opening up access to growing for local people. Please help it to go ahead!
1495	02/06/2019	grow-more,volunteer,gtg	Absolutely brilliant!
1493	02/06/2019	grow-more	Good luck!
1491	02/06/2019	grow-more,volunteer,gtg,visit,business	Best of luck! This would be an amazing opportunity to put life back into this growing space and what a great opportunity for the people of Glasgow. Just what we need in the city.
1489	02/06/2019	grow-more,visit,volunteer	I think this is a fantastic use. Was delighted to read about the vision. I was looking over at the site the other day and thought it a real shame that I wasn't put to better use. Maybe there could be some link with the hospice too?
1488	02/06/2019	grow-more,volunteer	I think this is a fantastic location for the proposed plan.
1484	02/06/2019	grow-more,volunteer,gtg,visit	this is a brilliant project, it will reuse facilities, educates about food growing and offers the possibility to buy local produce: I am 100% behind it.
1482	02/06/2019	grow-more,volunteer	Locavore helped kick start our project with a small grant.The Befriending Food Experience is now flourishing providing nutritious food in older people's own homes and in the Elderpark Community Centre.All had been lonely and lacking opportunities to access good food. This initiative would benefit so many malnourished people in our community ,including our befriendees.
1481	02/06/2019	grow-more,visit	We would also bring the people to enjoy the growing environment. I am in the process of setting up an organisation Called
1480	02/06/2019	grow-more,gtg	STAGE (Scottish Talent Across Generations Events) It would be wonderful to be involved at the start of something new in the Area
1479	02/06/2019	grow-more	Amazing opportunity for Glasgow and this too be a catalyst for even more like this.
1475	02/06/2019	grow-more	The people at Locavore have worked tirelessly for years to bring delicious locally grown vegetables. Good luck to them. I'd like to see growing events and workshops in Glasgow for all age groups, for hobby to small and large commercial, particularly organic food growing. Having a locally run centre focussing on this will be greatly valuable.
1472	02/06/2019	grow-more	There's definitely scope for getting kids involved, which is maybe what Grow The Growers is? Anyway is a great initiative and totally timely.
1468	01/06/2019	grow-more	Fantastic to see this space used again for the benefit of the people of Glasgow - let Glasgow flourish!
1465	01/06/2019	grow-more	We need much more of this. These folks have come from strength to strength.
1464	01/06/2019	grow-more,business	This idea is such an important and wonderful opportunity for everyone to connect with each other and learn how to live sustainably, eat and cook healthy food and overall community well being. This idea could be rolled out to all our Parks and use of former annual flower beds. Really interested and keen to be involved. Looking for a new job / career change into social and therapeutic horticulture. Landscape background. Already volunteering in gardening projects. Good Luck.
1461	01/06/2019	grow-more,volunteer,gtg	☐
1458	01/06/2019	grow-more,gtg	This is an excellent step towards greening Glasgow, in to support and increase local food growing and employment, sustainability initiatives for health and climate challenge, and reducing the impact of climate change by keeping things organic and local. Please support this initiative. Glasgow's lives depend on it!
1448	31/05/2019	grow-more,volunteer,visit,business,gtg	Hi I'm an electrician and I'm also an events management company with sound equipment lighting staging etc I think I could help you a lot with my skills connections I'd love to help Love this! We might be interested in growing some tomatoes and herbs but I would need to have a good look at how realistic this would be re financial stuff and my time... Keep me posted - all the best!
1444	31/05/2019	grow-more,business,visit	Laura
1439	30/05/2019	volunteer,grow-more	Think this is an amazing idea. Will be interested in getting involved.
1435	30/05/2019	grow-more,volunteer,gtg,business	This is a fantastic opportunity and would only add to the city's moniker as the Dear Green Place. Opportunity for jobs and training for a community based initiative are always only a good thing. This would be pioneering for any city, and Glasgow could wear it as a badge of honor.
1431	30/05/2019	grow-more,volunteer,dtg	Awesome idea!
1427	29/05/2019	grow-more	This is a brilliant idea. I shop in Locavore and appreciate the organic locally sourced food. Food like this is the future and this is a great way to start!
1426	29/05/2019	grow-more,volunteer	I am an environmental consultant employed by an agricultural consultancy, so I could answer or find answers to agri and environmental questions quite easily.)
1422	28/05/2019	grow-more	I think its so important to reduce unnecessary waste, this scheme would help reduce waste and improve access to locally grown food
1421	28/05/2019	grow-more	Love this idea so much
1406	27/05/2019	grow-more,gtg,volunteer	There is a rising demand for organic and local produce due to concerns over political uncertainty, climate change and health. Locavore already helps out with these needs a great deal, but will increasingly struggle unless more growing, education and community space is made available. I would like to learn more about composting fabric scraps or atleast how to support best practice when it comes to recycling textiles that are not in the form of a wearable garment?
1403	27/05/2019	grow-more	Thanks!
1401	27/05/2019	grow-more,gtg	Fantastic idea
1399	27/05/2019	grow-more	Great plan, keep up the fantastic work!

		The Scottish Farm Land Trust aims to support new entrants to start agroecological farming in Scotland by increasing access to land, which is often the biggest barrier for new entrants.
		Locavore's work supporting people to start market gardening through the Grow the Growers scheme has proved itself popular and successful. We hope to see the scheme continue, and having access to a bigger site such would add significantly to the opportunities for new growers as a training site.
		Locavore also work to supply fresh local food to people in and around Glasgow, but producing quality produce is a challenge and there are very few local suppliers. Having access to this kind of site would mean locavore can significantly increase the amount of local food it is able to supply.
1398	27/05/2019	grow-more,visit
1385	26/05/2019	grow-more
1381	26/05/2019	grow-more

1351	25/05/2019	grow-more
		<p>Taking on this kind of infrastructure requires long-term management in order to get the most out of it, and we would support Locavore in this endeavour.</p> <p>Brilliant idea,wish this project every success and hopefully will inspire others to follow suit and make good use of empty spaces within our urban landscape.</p> <p>Will you sell the produce to the local community?</p> <p>Great opportunity, imagine if this could be the start of sustainable food for all in Glasgow</p> <p>It would be great to see this site being brought into productive community use and increase opportunities for people to grow their own food.</p> <p>Brilliant . Good luck.</p> <p>I recently visited the new hospice which overlooks this site. I thought what a terrible waste and how much could be done. Delighted to support Locavore and their vision for organically grown local produce.</p> <p>Brilliant idea...let Locavore turn this into a long term project please!</p> <p>Would be very excited to see it happen - great for small food producers and for local consumers, as well as everyone who would benefit from volunteer and employment.</p> <p>A site this large could involve the surrounding schools as a teaching tool. I think the local communities would benefit greatly from an initiative like this and the opportunities are vast not to say the least that the food will be locally grown.</p> <p>I believe I can offer a lot of support. In return, I would like to ask for some involvement. Can someone please email me on martinlacollier@gmail.com?</p> <p>Thanks,</p>

		<p>Great idea, will be super to see some use from this site. Good luck.</p> <p>Well done. This would be a great step in direction of how ambitious we need to be about feeding our communities.</p> <p>Locavore has made locally-grown organic food accessible to consume and produce in Glasgow. It has already had a beneficial impact in the Queen's Park area, it would make a huge difference for them to develop urban food growing and education in Bellahouston with the security an asset transfer would give.</p> <p>Great idea. Grow local produce.</p> <p>Great idea using existing sites that can be re purposed for the good of Glasgow</p> <p>And people of Glasgow</p> <p>Very interested to help out any way I can, weather hands on or through links with the agricultural sector in Scotland.</p> <p>Fabulous idea!</p> <p>The efforts locavore has made in producing food locally and highlighting the need for such efforts to be made have been enormously successful so far more growing space and more interaction with local growers and communities will be a great next step in the journey towards local food security</p> <p>I'd also like to shop for fruit and veg here. Would be easier to get to than the shop.</p> <p>Fantastic initiative, good luck</p> <p>Reclaiming unused property can only be good and locavore are an excellent organisation</p> <p>I live right at Bellahouston Park and can't think of a better thing to do with the place. This would be amazing. Sign me up.</p> <p>A fantastic initiative, I wholeheartedly support this. The site is currently a wasted resource and it deserves to be put to good use for the community. It would also compliment the new hospice and could be used for gardening therapy</p> <p>Great!</p> <p>Fabulous idea.</p> <p>Good luck with it all. Hope you secure the funding needed.</p> <p>I'm a local resident and my family would be very interested in getting involved.</p> <p>Interested in food waste composting at the site or a possibly biomass generator?</p> <p>I'm a local resident staying in Moss P</p> <p>This is a fantastic opportunity for Glasgow. With a longer timeframe agreed this could allow for much better planning and growth - both of local fresh food and of the facility.</p> <p>A great location for growing local flowers too, right by a wedding venue -House for an Art Lover!</p> <p>Do a crowd funder!</p> <p>Being able to source, even more, good quality local organic food is far superior to buying food from half way around the world. It's great for the local economy too.</p> <p>Wish you guys all the best in that new adventure!</p> <p>Supporting Locavore is truly one of the best things I have ever done in recent years. This social enterprise gives a lot more back than it takes and I am always referring them to friends. I hope never to shop in a supermarket ever again because they support local growers and farmers and the quality of their produce is tip-top. I would love for them to expand and to provide more and more people with veg and support - their charity efforts are astounding. X</p> <p>What a great idea. This project could really educate the public to help them grow their own food. But also to appreciate their food more which might cut back on food waste. This would help with the Love Food Hate Waste campaign</p> <p>Brilliant, brilliant, brilliant news</p> <p>Great project idea. I would be interested in volunteering on the project and bringing children's groups to the site to get experience of growing your own produce in a sustainable manner. I was also raised on an organic smallhold and have experience with animal husbandry and a keen interest in low impact regenerative agricultural practices if this is something the project is considering. I would suggest a share button on the pledge page for better social media coverage</p> <p>I'd love to help with this as it's an amazing idea! I am on the waiting list for veg box from locavore and an allotment so this could keep me busy mean time! Very interested in sustainability/permaculture/organic gardening so would love to be involved in this project. Very grateful that organisations like Locavore are looking into ways to #growglasgow! Xxx</p> <p>Brilliant idea and use of the site!</p> <p>Glasgow is becoming a leading clean food awareness city! This is a brilliant idea aiding the much needed turn to helping environment issues... a definite must project.. WTG Bellahouston x Good luck x</p> <p>Amazing idea for the city.</p> <p>Chefs need access to better quality Scottish grown veg - access to a reliable supplier that can guarantee Scottish grown is really hard to come by, despite there being huge demand in our cities</p> <p>restaurants</p> <p>I can give a critical view on business plans etc.</p> <p>This sounds wonderful! Thanks for all the initiative - looking forward to seeing this grow!</p> <p>This all sounds incredible, well done to you fantastic people! Moving back up to Glasgow in August and I would jump at the chance to be involved, especially if I could start my own small organic business</p> <p>Fantastic idea!</p> <p>It would be great to see a disused and abandoned space being brought back in to sustainable use</p> <p>Would love to meet with you guys we have just gone through a 4 year long negotiation with South Lanarkshire Council asset transfer ... we got it in the end it's still a lot of work to get there !</p> <p>My daughter is currently in nursery and they are taken to local allotments. I'd love to be able to suggest to the nursery to go on a trip to show the children what a community can build. Showing them the importance of up cycling not only objects but places.</p> <p>What a great initiative! 🍀</p> <p>This is an amazing idea to make glasgow more sustainable and really build community spirit!</p> <p>Might be a good teaching project for secondary school pupils.</p> <p>Well done. Great to hear this 🍀</p> <p>Didn't realise this was a vacant site, great to get it working for the community and educating the population on better eating habits. A free cook school would be a good ad on.</p> <p>I would like to see a transparent business plan for the use of the space and Locavores involvement.</p> <p>I would also like to try bee keeping, so some hives where people could keep their bees would be very interesting.</p> <p>Best of luck, I support what you are doing, and hope that carbon neutrality can be an achievable goal for the whole population.</p> <p>Good Luck! This will be fantastic for the area</p> <p>Sounds a great use of an unused facility</p> <p>I think it's a fabulous idea and would bring so many benefits!</p>

pledge-support-for-locavores-be

1150	23/05/2019	grow-more	It's so incredible to have the team behind Locavore to provide a sustainable way of life in Glasgow. They give a voice to so many people. The city would be a duller, less healthy and more polluted place without them. Thank you!
1144	23/05/2019	grow-more	It's so important to me to know that my food comes from somewhere good and local.
1142	23/05/2019	grow-more	I've lived in the area for 14 years and would love to have something like this close by. Great idea. I would love to have more access to locally grown good produce. It's a shame that we live in such a bountiful country yet it's difficult to come across good wholesome food. Full support from me.
1140	23/05/2019	grow-more	Fabulous idea!! As a biology teacher who is leading Learning for Sustainability in school I would be keen to bring groups of pupils along to learn about organic farming. I would also love to take on a plot for my family. I have two budding wee gardeners!
1135	23/05/2019	grow-more,volunteer,visit	We need more independent local traders like Locavore . They create and educate and promote kindness . organic living - made easy
1118	23/05/2019	grow-more	Good luck!
1106	23/05/2019	grow-more,volunteer,atq	This is a fantastic opportunity for the people of Glasgow to have access to locally grown, sustainable food. I am an avid gourmet mushroom farmer in need of space to do so. I plan to open a urban mushroom farm in Glasgow supplying Oyster, Shiitake and Lion's Mane mushrooms to restaurants and consumers but I'm struggling to find any regulation surrounding growing them in Scotland. All the information available is surrounding button mushrooms which involve a composting process that my process does not. I can grow mushrooms pretty much anywhere that the humidity and airflow can be controlled but what's more exciting is the further applications of mushroom mycelium in our modern world. Any guidance on starting out would be great too. Keep up the stellar work.
1100	23/05/2019	grow-more,business	I think this is a great idea and if anyone can do this brilliantly, these awesome guys can!
1098	23/05/2019	grow-more	So exciting to hear this! I'm a fairly recent but very enthusiastic supporter of everything Locavore do, and anything that gets people back connected to the land and the places they live in is wonderful. Looking forward to seeing how this progresses and hopefully getting involved!
1097	23/05/2019	grow-more,gtg,volunteer	Radical and visionary project - let's enjoy the nature of Glasgow's green spaces - by letting its abundant gifts improve our diets, lifestyles and communities. Go Locavore !
1094	23/05/2019	business,grow-more,gtg,visit	Would be great to see a regular local fruit and veg and flower market
1088	23/05/2019	grow-more	After much work on a similar project at Daldoie which fell through as Glasgow city council would not grant us a long term PTU, I am absolutely delighted to see this happen!
1087	23/05/2019	gtg,business	Can't wait! Best of luck! Been keen for something in the southside for a long time!
1083	23/05/2019	grow-more,volunteer,atq,business	Glasgow needs more opportunities like this which will benefit people's health and lifestyles. Organic and local is the future of our diet and will benefit our planet because it will reduce travel, CO2 emissions and will grant more people a fair wage and assurance of a better life.
1081	23/05/2019	grow-more	Great idea. Good for environment especially now Glasgow has declRed a climate emergency
1073	23/05/2019	grow-more	What a great idea, it would be lovely to bring children to it when they are a little older and see how and where our food is grown.
1071	23/05/2019	grow-more	It is really important to keep the city connected with nature, to give young and less young people the opportunity to learn more about it, to understand why it is important to protect it. Moreover, people are increasingly interested in eating local and supporting local businesses for ecological and economical reasons, this project could become a leading example for the rest of the country. Finally, it will provide additional jobs to the city.
1066	23/05/2019	grow-more,volunteer	Such a positive way to utilise the land
1065	23/05/2019	grow-more	Hello Locavore I am glad to see you are looking to use this space. Long story short I use to live in Kenmore street and often ran into Bellahouston park right passed this intended site. It's a great space. I thought about growing trays of wheatgrass and other sprouts here.
1057	23/05/2019	grow-more,business,gtg	Good Luck
1056	23/05/2019	grow-more	s Good luck guys, you're doing some amazing things! Very inspiring. Hi folks We're currently in the process of transitioning to a Social enterprise with the vision of creating a cafe/education hub in Govan. We could definitely make use of your project to supply us with produce and the space as an extension for our education programmes.
1047	23/05/2019	grow-more,volunteer,gtg,visit,business	Exciting times! Best of luck in your application.
1046	23/05/2019	grow-more	This sounds like a fantastic idea that could really increase Locavore's capacity to make local organic produce vastly more available to the community. Really hope the council backs this!
1044	23/05/2019	grow-more,volunteer,gtg,visit	Fantastic project
1038	23/05/2019	grow-more,volunteer,atq	Thank you for helping the community!
1037	23/05/2019	grow-more	Great idea and initiative in support of sustainability, very best of luck with the project. Locavore is a shop that is moving in the right direction in my opinion making local sustainable grown available. Their shop is amazing and gives a community feel. I would love to see them taking on more sustainable projects such as this one.
1029	23/05/2019	grow-more,volunteer	Growing and buying locally is the way forward. This can be pivotal for the local community.
1014	23/05/2019	grow-more	Growing and buying locally is the way forward. This can be pivotal for the local community.
1014	23/05/2019	grow-more	Would love this kind of project and others to inspire similar ones in edinburgh! Meanwhile very much supportive of it happening in Glasgow.
1003	23/05/2019	grow-more	Fantastic ambition !
985	23/05/2019	grow-more,visit	Would like more local veg, ideally would get a veg box if capacity could increase
984	23/05/2019	grow-more	This is a great idea to support the knowledge and experience local people need about growing your own produce and being able to eat affordable local organic food. Very exciting development for Glasgow!
982	23/05/2019	grow-more,volunteer,gtg	Love this.
980	23/05/2019	grow-more,volunteer,atq	I think this is a fantastic idea and will be a great hub for the local community. It will be particularly great for local kids to learn about and get involved in growing fruit and veg.
977	23/05/2019	grow-more,volunteer	Locavore have worked with classes in our school as well as the eco committee. They have donated window boxes to us and lead activities to share where food comes from and encouraged children to grow their own We'd love to be invited to their new Bellahouston site
973	23/05/2019	visit	This is a wonderful ideal I wish you every success I am an experienced and enthusiastic gardener, but with health restrictions if there is any way I can assist, given understanding of my physical limitations (I ache a lot, cannot bend well, and do not 'do' high temps - maybe I could help in the winter when other people generally do not think about growing stuff?), I will be very glad to join in! All power to you! An amazing idea and great use for empty space Excellent idea and while we are at it we are crying out for better recycling in Glasgow city council areas! Sounds amazing, good luck! Great project if it comes off. Good luck All the very best with this! This is an incredible idea ves please! myself and my partner are also opening a plant based seasonal cafe southside this year, and we would love to collaborate at some point!! Excellent!! Great plan from a great organisation - I fully support this I've been on the waiting list for a veg box for a while. The fact that there's a waiting list speaks volumes to the requirement for more locally grown seasonal organic veg supply. Great idea! I'm a local photographer, if I can help give me a shout. ☺ For the sake of the planet, our health and wellbeing and local communities it's paramount that projects like this are supported to grow and develop.
960	23/05/2019	grow-more	This is what I've been looking for. I think it would be a great idea to bring this to Bellahouston. I can't wait to see it happen.
959	23/05/2019	grow-more,volunteer,atq	Brilliant initiative !
952	23/05/2019	grow-more	Great idea to use an existing facility to bring more top quality local grown produce.
950	23/05/2019	grow-more	Fantastic idea with so so much potential! Exactly what's needed
945	23/05/2019	grow-more,business,gtg	Locavore is an amazing establishment and it's important to continue the pursuit of a self-sufficient and healthier Scotland.
944	23/05/2019	grow-more,volunteer,atq	Good luck!
943	23/05/2019	grow-more,volunteer,gtg,visit,business	Love this! Thank you so much for all the work you're doing. You are such heroes and Glasgow is so grateful!

pledge-support-for-locavores-be

883	23/05/2019	grow-more,volunteer,gtg	There is already a huge and growing demand for locally produced organic food. With Glasgow being the progressive city that it is and now pledging to be the first carbon neutral city it is so important that we support projects like this and show the rest of the UK how providing local organic produce within a city is possible!
878	23/05/2019	grow-more	I volunteer with the Woodlands community trust cafe on Mondays - would be great to use more locally grown food for our Monday community meal!
876	23/05/2019	grow-more	Brilliant initiative by a brilliant organisation which is real asset to our city. Keep up the good work!
871	23/05/2019	grow-more	It's an incredible site and a thoroughly exciting enterprise. I wish you all success in this endeavour. Will there be plots to rent/buy? Possibly interested if so Thanks Great idea to re-use an existing site, offering more locally-grown produce for sale and an educational venture to encourage the next generation of vegetable eaters. I think this is a tremendous idea. My daily commute used to take me past here and being a HND graduate of Horticulture I always envisioned a food production business here. I think this would be a valuable asset to the city This is a wonderful idea and would be great for Glasgow if I didn't have 2 small children I would absolutely volunteer Great to see something like this happening with an otherwise wasted space. Fantastic stuff 🙌❤️ I'd love to lend a hand as well if it's needed.
867	23/05/2019	grow-more	Thanks
866	23/05/2019	grow-more	Great idea to re-use an existing site, offering more locally-grown produce for sale and an educational venture to encourage the next generation of vegetable eaters.
865	23/05/2019	business,cta,volunteer,arow-more	I think this is a tremendous idea. My daily commute used to take me past here and being a HND graduate of Horticulture I always envisioned a food production business here.
864	23/05/2019	grow-more,volunteer,gtg	I think this would be a valuable asset to the city
857	23/05/2019	grow-more	This is a wonderful idea and would be great for Glasgow if I didn't have 2 small children I would absolutely volunteer Great to see something like this happening with an otherwise wasted space. Fantastic stuff 🙌❤️ I'd love to lend a hand as well if it's needed.
856	23/05/2019	grow-more,volunteer,gtg	Cheers
850	23/05/2019	arow-more,volunteer	Yes to a greener more sustainable Glasgow!
842	23/05/2019	grow-more	Looking forward to a new local food shopping experience. If you also want to link with local craftspeople, I would be happy to be involved.
841	23/05/2019	arow-more,volunteer,cta	A great use for an underused park! Extremely welcome. This sounds fantastic!
833	23/05/2019	grow-more	Good luck
829	23/05/2019	arow-more	I have a plot with Southside Allotments in Pollok Park. Waiting lists are long and I know plenty people looking to grow their own. This would be a great addition for the local community
825	23/05/2019	grow-more,volunteer	Sounds a great idea.
823	23/05/2019	arow-more	Could a percentage of the food produced be given to local food banks based on the south side
820	23/05/2019	grow-more	It would be great to see this space brought into use for the local area & to become a productive community hive.
813	23/05/2019	arow-more,volunteer	Best o' luck!! :) x
807	23/05/2019	grow-more	As a grower of fresh produce at home. This would be a great project and would supply organically tasteful food.
808	23/05/2019	arow-more	A great initiative!
800	23/05/2019	arow-more,volunteer,cta	We find it a struggle to find local growers of vegetables in a quantity and range to give our customers a real alternative to buying vegetables with high food miles from supermarkets. We whole heartedly support this ambitious project and look forward to our growing number of Food Hubs being an outlet for some of these new producers to bring their produce to market for a fair price, allowing them to be not just sustainable, but profitable. The Bellahouston Project is a brilliant use of a currently unused space! A fantastic opportunity to reuse the site and provide benefit to the community. I am a complete novice to food growing but really love your idea and outlook. I have been on a waiting list for an allotment so I can grow veg, your site will be perfect. I live locally. A great idea. I hope you get all the support you need. I'd love to see this happen. If Glasgow wants to lead on the environment with initiatives like efforts to decarbonise their economy etc. Community Asset Transfer would be a bold statement of direction. Great idea to have more locally sourced food, better for environment Great idea - good luck! Brilliant idea to keep the site in use as a major growing space. Locavore are uniquely placed to make a success of this venture. As a neighbour, I would far rather see the site being taken over by an ambitious venture like this than have it "developed" as housing or some such thing that gives nothing back to the city. I'd also like the Locavore office to move out of the shop to Bellahouston to increase our productivity and further benefit the business. What a fabulous idea. It would be great if the council could make it happen This needs to happen. What a wonderful idea, the people of Glasgow need this and projects like it! What a fantastic idea. It's a project long overdue. Can't wait for the results. Locavore is a fantastic and thriving addition to the Southside community. I am confident of its ability to turn this into a "fruitful" space that will provide employment and educational opportunities for people in the local area. I don't think Bellahouston attracts as many people as nearby Queens Park so would benefit from this community activity. It is a positive, constructive reason to bring people to the park. A lot of people do not have garden space in which to get the pleasure of growing things. Allotments have lengthy waiting lists and some do not have the time commitment or knowledge to maintain a plot of their own. This seems like a well-organised alternative, that will allow different levels of involvement and provide support to participants. I am very much in support of this project.
793	23/05/2019	grow-more	Yes! This sounds wonderful.
790	23/05/2019	arow-more	Have you seen the project Ceres in Melbourne? Worth a look for inspiration; they transformed an old rubbish dump into an amazing urban food growing space and it's been very successful.
786	23/05/2019	grow-more,volunteer	This would be such an incredible step in Locavore's journey. Yes. Yes. Yes!
782	23/05/2019	arow-more	I'm VERY local to this site and I think it will be a wonderful asset to the community and to Glasgow
776	23/05/2019	grow-more,gtg	So needed. So little local food available. Permaculture classes ,natural building classes would be great.
771	23/05/2019	arow-more,volunteer,cta,visit,business	Linking with other social enterprise to provide a joined up service.
769	23/05/2019	grow-more	I think this is a brilliant idea. I live around the corner from Bellahouston park and would love to get involved with the project. I think it could also bring a lot of opportunities to the local community.
766	23/05/2019	arow-more	Glasgow desperately needs more places like this where people can go to learn how to grow and look after food producing plants/collecting seed/the environment etc.
763	23/05/2019	grow-more	Would love to see some beehives here as well!
757	23/05/2019	grow-more	Fantastic idea..... I hope Glasgow Council will see the huge potential benefits for this transfer of focus for the site.
755	23/05/2019	arow-more	This is a fantastic project, showing that even in the city, we can consume local produce and help contribute to Glasgow's plans to be environmentally sustainable.
754	23/05/2019	grow-more	What is the point of the space and resources sitting unused and neglected. I would rather an organisation, like Locavore, be able to take on responsibility and the initiative to make the space thrive. It will also be an amazing resource to have in our community.
745	23/05/2019	arow-more,volunteer	I lived in Glasgow for half my life and although I am no longer there I keep in touch with friends and family. Locavores shop is just around the corner from where I used to live and it is brilliant project. It needs to grow a dub times of uncertainty Glasgow's local food supply needs to grow. Glasgow city council please support this project. Good luck Sounds fantastic and the more locally grown food the better Forward thinking idea for The use of this space cutting down journey time and fuel consumption to get produce to the shop. Ideal location! What an amazing project! Would be a huge asset to the community. This is a great idea and would be wonderful to see the site in use. I think the local families, schools and nurseries will benefit loads from the social interaction, learning and fresh air. Fantastic idea My ten year old loves growing vegetables. She's a Powerchair user. I'd love to see a fully accessible site with raised wheelchair accessible beds. Brilliant plan. More home grown organic produce is excellent. Good luck! Go Locavore! You just keep getting bigger and better. Amazing stuff. Viva la revolucion! Sounds like an amazing opportunity. The green houses that are. Wing closed down in glasgow green and other parks should also be considered for urban growing I work as a childminder and if I was able to bring the children with me to help and observe what is growing. It would be a good experience for them. I think if schools and nurseries were able to visit it would be a great opportunity too.
743	23/05/2019	grow-more,visit	Glasgow desperately needs more places like this where people can go to learn how to grow and look after food producing plants/collecting seed/the environment etc.
742	23/05/2019	grow-more,volunteer,gtg	Would love to see some beehives here as well!
741	23/05/2019	arow-more	Fantastic idea..... I hope Glasgow Council will see the huge potential benefits for this transfer of focus for the site.
740	23/05/2019	grow-more,volunteer,visit	This is a fantastic project, showing that even in the city, we can consume local produce and help contribute to Glasgow's plans to be environmentally sustainable.
738	23/05/2019	arow-more	What is the point of the space and resources sitting unused and neglected. I would rather an organisation, like Locavore, be able to take on responsibility and the initiative to make the space thrive. It will also be an amazing resource to have in our community.

683	23/05/2019	grow-more,visit,business,gtg,volunteer	Glasgow desperately needs more places like this where people can go to learn how to grow and look after food producing plants/collecting seed/the environment etc.
677	23/05/2019	arow-more,cta	Would love to see some beehives here as well!
676	23/05/2019	grow-more,volunteer,gtg	Fantastic idea..... I hope Glasgow Council will see the huge potential benefits for this transfer of focus for the site.
675	23/05/2019	arow-more,volunteer	This is a fantastic project, showing that even in the city, we can consume local produce and help contribute to Glasgow's plans to be environmentally sustainable.
674	23/05/2019	grow-more,gtg	What is the point of the space and resources sitting unused and neglected. I would rather an organisation, like Locavore, be able to take on responsibility and the initiative to make the space thrive. It will also be an amazing resource to have in our community.
668	23/05/2019	arow-more	I lived in Glasgow for half my life and although I am no longer there I keep in touch with friends and family. Locavores shop is just around the corner from where I used to live and it is brilliant project. It needs to grow a dub times of uncertainty Glasgow's local food supply needs to grow. Glasgow city council please support this project. Good luck Sounds fantastic and the more locally grown food the better Forward thinking idea for The use of this space cutting down journey time and fuel consumption to get produce to the shop. Ideal location! What an amazing project! Would be a huge asset to the community. This is a great idea and would be wonderful to see the site in use. I think the local families, schools and nurseries will benefit loads from the social interaction, learning and fresh air. Fantastic idea My ten year old loves growing vegetables. She's a Powerchair user. I'd love to see a fully accessible site with raised wheelchair accessible beds. Brilliant plan. More home grown organic produce is excellent. Good luck! Go Locavore! You just keep getting bigger and better. Amazing stuff. Viva la revolucion! Sounds like an amazing opportunity. The green houses that are. Wing closed down in glasgow green and other parks should also be considered for urban growing I work as a childminder and if I was able to bring the children with me to help and observe what is growing. It would be a good experience for them. I think if schools and nurseries were able to visit it would be a great opportunity too.
661	23/05/2019	gtg,arow-more	Glasgow desperately needs more places like this where people can go to learn how to grow and look after food producing plants/collecting seed/the environment etc.
658	23/05/2019	grow-more	Would love to see some beehives here as well!
644	23/05/2019	grow-more,gtg,visit	Fantastic idea..... I hope Glasgow Council will see the huge potential benefits for this transfer of focus for the site.
641	23/05/2019	grow-more	This is a fantastic project, showing that even in the city, we can consume local produce and help contribute to Glasgow's plans to be environmentally sustainable.
629	22/05/2019	grow-more	What is the point of the space and resources sitting unused and neglected. I would rather an organisation, like Locavore, be able to take on responsibility and the initiative to make the space thrive. It will also be an amazing resource to have in our community.
626	22/05/2019	visit,volunteer	I lived in Glasgow for half my life and although I am no longer there I keep in touch with friends and family. 609	22/05/2019	grow-more	Former resident of Pollokshields and continuing veg-box subscriber here in Edinburgh. This sounds like an exciting plan! Look forward to hearing more!
607	22/05/2019	grow-more	As a long term supporter of Locavore and a business customer of their beautiful wholesale organic fruit and veg we would love to see more urban growing spaces, showing people what can be grown in Scotland and supporting more small businesses like ourselves to sell healthy, local produce.
602	22/05/2019	volunteer	This is a no brainer, Glasgow needs this.

			I've tried this at Scottish agriculture college in Ayrshire and it was too expensive and then wouldn't sell it and then demolished most of the greenhouses and finally they sold other areas off far from any reasonable price!
600	22/05/2019	volunteer.gtg.business	Good for you! Right time and place and people!
597	22/05/2019	grow-more.gtg.visit.volunteer	You should contact all the surrounding community councils to ask for their direct support.
596	22/05/2019	grow-more	What an exciting vision!
589	22/05/2019	grow-more	Locavore is an amazing concept and I love the thought of bringing my grandkids to see the growing process. I believe educating youngsters in food growth helps them to appreciate what they have on their plates x
574	22/05/2019	grow-more.gtg	Great use of an unused nursery and the way forward to grow good food locally for the people of Glasgow.
573	22/05/2019	grow-more	I wish the project well.
570	22/05/2019	grow-more	Locavore are an inspirational team with a track record of success.
556	22/05/2019	grow-more	Amazing opportunity for an already positive asset to the community taking leadership and improving Glasgow. Love this idea and think Locavore will do it justice and give it the effort it deserves! Good luck and bring your work!
554	22/05/2019	grow-more	Financial investment. If you get the asset transfer.
553	22/05/2019	grow-more.gtg.volunteer	I will give you £1000 and if you wish lend you £5000 interest free repayable over 3 years We need more of what Locavore do in and for the city and we definitely need to educate our children about where food comes from and how to grow and cook their own food. This can only be a great thing for Glasgow.
547	22/05/2019	grow-more	Fantastic news, I've been very into buying organic fruit and veggies since watching a programme called 'food matters'.
546	22/05/2019	grow-more.volunteer.atq	I can't wait to support your business by buying your organic products.
541	22/05/2019	grow-more	Great Initiative!
533	22/05/2019	grow-more.gtg	This is a great idea to reuse the space for one of the purposes it was created for. It's a shame this site is no longer in use. It should remain a productive, garden space. Allowing Locavore to develop it and use the space as a sustainable low carbon market garden fits in with Glasgow City Council recent announcement to reduce its carbon footprint. It also has the potential to create jobs and allow people vital skills they can transfer elsewhere. If Brexit becomes a reality, we'll need places like this! We need to grow food more locally we need to grow more healthy food we need to train more people to grow food we need to set up systems to recycle food waste into compost we need to cut down energy use we need to educate people about growing food. What's not to like about this project? This is an ambitious plan, but a great solution for this disused site - I wish you all the best going forward. Small-scale, locally-focused food production is only going to become more vital in the years to come. Having a growing site at Bellahouston would be amazing, for so many reasons! Another great step in growing food sustainably in Glasgow - great idea! I'll definitely support when it's up and running. Love this idea and would love to see kid classes in teaching them how to be self sufficient by growing veg etc. In fact, would love adult classes in this too. I'm all for organic veg but hate the hoops people have to jump through. Can't you have it basically organic without the crazy price tag label? I know some of my other friends in Glasgow feel the same.
526	22/05/2019	grow-more	Keep up the great work.
522	22/05/2019	grow-more	Brilliant idea! Let's make Glasgow self sustainable x
511	22/05/2019	grow-more.gtg.volunteer	I would like to buy produce that is grown
510	22/05/2019	grow-more	Sounds like another great 'imagining' from Locavore, hope it is as successful as your other ventures.
508	22/05/2019	grow-more.volunteer	I can't wait to visit it!
506	22/05/2019	grow-more	Would be great to see this disused site being used positively!
504	22/05/2019	grow-more.atq	Happy to have my local choir singing on the day of the opening!
502	22/05/2019	grow-more	We are facing a climate crisis and need cleaner, greener and more local solutions to our food and waste. This project and the team behind it have shown they can deliver, that they have the ambition and expertise to pull this off. Given Locavores existing southside base this project would be beneficial to the local community and no doubt the organisation.
490	22/05/2019	grow-more.volunteer.atq	
488	22/05/2019	grow-more.volunteer	
487	22/05/2019	grow-more.volunteer.atq	
479	22/05/2019	grow-more	
477	22/05/2019	grow-more	
475	22/05/2019	grow-more	You've done so well so far - it would be great to see you grow(!) to the next level.
474	22/05/2019	grow-more.volunteer	great idea, maybe the wintergardens in Springburn next?
471	22/05/2019	grow-more	Fantastic!
469	22/05/2019	grow-more.volunteer	What a fantastic idea to use this space. Very best wishes with making it live again!
468	22/05/2019	grow-more	Such a great plan to positively impact the lives of Glasgow residents in a variety of ways. I'll be particularly interested in helping set up and run the Café when you get to that stage.
463	22/05/2019	grow-more	Best of luck with the transfer! 🍀🍀
457	22/05/2019	grow-more	I'd be interested in learning to grow my own/permaculture/volunteering.
453	22/05/2019	grow-more.volunteer.atq	What a good idea, encourage all ages to participate
445	22/05/2019	grow-more	I trust you will make the most of this unused space and can't wait to see what you will do with it. This would be an amazing use of space, for an organisation that already has big demand! Enabling them to grow it beyond the food they grow and engage with the community is really exciting and a great opportunity - one that I think that the Southside in particular, but Glasgow will readily embrace.
434	22/05/2019	grow-more.gtg	This is brilliant. Well done for your initiative. Hope this happens
432	22/05/2019	grow-more	can't think of better custodians of such a space as Locavore - Southside dream team.
429	22/05/2019	grow-more.volunteer	Growing food and gardening in general are good for everyone! It would be great to see GCC supporting this kind of initiative to show they believe the same.
428	22/05/2019	grow-more	My family often shop at Locavore and enjoy the fresh local produce.
411	22/05/2019	grow-more	This is fantastic! What a positive way to use an unused site for the benefit of everyone. Good luck locavore!
410	22/05/2019	grow-more	This would be a fantastic use of this space. Hopefully growing organic food locally, will enable the produce to be more affordable to the people of Glasgow.
407	22/05/2019	grow-more	GOOD LUCK!
400	22/05/2019	grow-more	Really hope you are successful. Great to see how you are growing.
397	22/05/2019	volunteer.grow-more.gtg	Locavore is a real community hub doing great things in Govanhill and Southside. Keep it up! 🍀🍀 will Totally back this 100% cannot think of a better way to use this unused site
390	22/05/2019	grow-more.volunteer	
387	22/05/2019	grow-more	What a great idea! Well done guys!
381	22/05/2019	grow-more.volunteer.visit.business	I work at Penilee Community Centre and this would be of great interest to the groups and users we currently host, especially Capability Scotland.
375	22/05/2019	grow-more	This is very exciting!!
373	22/05/2019	grow-more	Live locally - think this is a fantastic idea
371	22/05/2019	grow-more.volunteer	This is a brilliant idea to provide local grown produce & learning opportunities to bring the community closer together
370	22/05/2019	grow-more	What an incredible project. Local schools could gain so much by taking pupils along to learn from work such as this!
369	22/05/2019	grow-more	This project will help slow the fast pace of life, and help build patience in our communities; No more 'I want it, and I want it NOW!' Hopefully people will invest time and reap the rewards! x
368	22/05/2019	grow-more	Can't wait to see what happens As a south side resident, I am really supportive of this idea! In a city with such deprivation and poor health, any effort we can make to grow locally and teach about growing your own food is worthwhile.
345	22/05/2019	grow-more.volunteer.gtg	This could change outcomes for future generations!
344	22/05/2019	grow-more	Great idea! Best of luck with it!
340	22/05/2019	grow-more	What a wonderful idea. Locavore is such a great organisation and it would be an amazing project putting this land to good use for the local community. I really think a long term lease for this site would be an excellent idea for Locavore as I know the fullest use will be made of it. I think anything that seriously increases the amount of local growing and involves schools and as many other groups as possible will be an asset to Glasgow, and the council itself.
337	22/05/2019	grow-more.volunteer.visit.business	Glasgow Council, this is a win win for you! An unused site is maintained and renewed, you up your green credentials and you help create a community social hub. What's not to like!
336	22/05/2019	grow-more.volunteer.atq	Fantastic opportunity for Glasgow to provide good local organic food. Well done Glasgow City Council
334	22/05/2019	grow-more	Locavore have done excellent work to ensure our fruit and veg are coming from local sources, reducing our plastic use, carbon footprint, and helping build confident local growers. There is not a better use for the space at Bellahouston than growing local, tasty produce!
332	22/05/2019	grow-more.business	This would be great!
331	22/05/2019	grow-more	

pledge-support-for-locavores-be

330	22/05/2019	grow-more	As a local resident (Mossspark, immediately adjacent to Bellahouston) I would be particularly keen to see this project go ahead. I would also be interested in taking on a plot as an allotment, if that were to be something that might happen!
326	22/05/2019	crow-more,dtq,volunteer	Fantastic idea. Most of my family live locally and I would love to get involved with my children. Glasgow Locavore is a unique enterprise redefining the local food system for the better in Glasgow and much further beyond. We're fully behind this application and urge you to back their brilliant plan.
325	22/05/2019	grow-more	Regards, ☺
323	22/05/2019	grow-more	Wonderful idea! After unsuccessfully searching for suitable space to grow food for myself whilst living in rented, tenement accomodation, I would jump at the chance to help out in the space if possible. We need less air miles on our food and more hands-on involvement with growing it within and for the community. This is a disused space which would be in the safest of hands with Locavore.
317	22/05/2019	grow-more,volunteer,gtg	Locally grown organic produce at affordable prices.
316	22/05/2019	grow-more,volunteer,gtg,visit,business	Having several complex health issues, an organic diet has been immensely helpful to help fight inflammation at bay.
312	22/05/2019	crow-more,dtq,volunteer	I think its important to try and become more sustainable and produce our own produce in the city and everywhere in Scotland!! I'm an avid grower of chilli's and other protected crops. Recently graduated at SRUC with a BSc in Horticulture, I would love to be included in this project.
308	22/05/2019	grow-more,volunteer,gtg,visit,business	You have my support 100%
305	22/05/2019	grow-more	This has to be the way forward, good quality produce grown locally. It removes the plastic, the pesticides and the carbon cost of shipping stuff about. Good luck Contracts to supply local fruit & veg to schools, hospitals etc
302	22/05/2019	grow-more	
293	22/05/2019	grow-more,volunteer	I don't live in the immediate area, but think it could be a fantastic venue to benefit the wider community, and lead the way on homegrown & locally sourced produce. Good luck with this initiative, would support Crowd-funding or co-operative model or shares financially to help this get off the ground, and know plenty others would want to contribute small amounts to help. I think it would be a great facility for new growing in the city, as well as for local people to visit and enjoy, perhaps even taking on part of a plot or a raised bed. We don't have a garden and neither do many tenement dwellers in the area, so a different wee greenspace we could visit (and perhaps take part in, helping grow local food, learn more about growing, and enjoy a bit of time in nature) would be fantastic. I also imagine wee community garden growing and cooking parties could take place and bring a whole bunch of local strangers together to become friends if there were local volunteering opportunities! Providing more Glasgow grown fruit and veg to sell in the city is a great idea
291	22/05/2019	grow-more,volunteer,visit	Great idea, really good for local community and will contribute to healthier environmental issues. Really excited to see what local events there will be too
290	22/05/2019	grow-more	A fantastic opportunity to for local people to be involved. A very worth while project for a site lying empty with so much potential to benefit the local community.
286	22/05/2019	grow-more	Fantastic! Best wishes for the CAT!! ☺
284	22/05/2019	grow-more,business	As a local resident in the area of the park I'd be delighted to know this space was being used in such a positive way
276	22/05/2019	grow-more,volunteer	This is an amazing idea, both in terms of making use of the unused site and in getting more local food available for Glasgow. I am lucky enough to have an allotment in the Southside and I know many of my friends are on long waiting lists and would love to have the opportunity to try growing food. I also run walks and workshops around plants and health, a site like this would be an ideal opportunity to share knowledæ and skills.
275	22/05/2019	visit,volunteer,grow-more	Go Glasgow! Having just submitted my Master's thesis on urban agriculture, I should say I am quite passionate about it. I'd love to help!
271	22/05/2019	grow-more,volunteer,business	Thank you for working on improving Glasgow! This is such a fantastic idea! With our ever changing climate and increasing environmental issues, growing food locally is something that definitely needs to become more of a priority. Having a space to produce locally grown food in Glasgow would be amazing and I'm sure so many people will want to be involved. I know I do! ☺
264	22/05/2019	grow-more,volunteer	This would be great for more employment and education about growing our own food, for people growing up and living in the brox/ gowan area.
262	22/05/2019	grow-more,visit,volunteer	Fantastic idea. Would be good to start from the off vegans?
260	22/05/2019	crow-more,volunteer,dtq	Amazing work. 100% back what you are doing, so refreshing to see and hopefully it will be the first of many sites! ☺
255	22/05/2019	grow-more,business,visit,gtg,volunteer	I
253	22/05/2019	grow-more	Fantastic idea which will benefit the local community. People can learn skills and eat more healthy. We need more projects like this across Scotland.
243	22/05/2019	grow-more,volunteer,gtg	This is an excellent initiative to foment local community and contribute to sustainable living.
238	22/05/2019	grow-more	This is a fantastic project from a business that has true community spirit, as well as admirable and much-needed environmental values. An urban food growing hub led by the team at Locavore would be an incredible addition to the Southside community.
235	22/05/2019	volunteer,grow-more	Scotland has been making huge progress in tackling issues of sustainability and environmental impact, with Glasgow acting as a home to so many different projects and organisations that champion the cause; allowing Locavore to set up a permanent community based food production project would be yet another feather in the city's already wonderful cap! This would be such a fitting use for this land and facility, and a win win for the council and local community. Please support this initiative!
233	22/05/2019	grow-more,volunteer	Fabulous guys. Wishing you very much success with this project.
229	22/05/2019	grow-more	Brilliant idea wishing it every success
227	22/05/2019	crow-more,volunteer	Only recently moved from Shawlands to Rutherglen after 10 years - what a great community organisation Locavore is, best of luck!
219	22/05/2019	grow-more,volunteer	This is such an amazing idea
218	22/05/2019	grow-more	Be great to see something like this in the north of the city perhaps springburn park it might work in conjunction with renovating the glass houses and draw people back to the park.
217	22/05/2019	grow-more,volunteer	A great idea - especially if local young people can get involved.
214	22/05/2019	grow-more	Sounds like a brilliant idea. I'd love to see it come to fruition!
213	22/05/2019	grow-more	fantastic idea to not only bring communities together but to promote good health for the people of Glasgow
209	22/05/2019	crow-more,volunteer,dtq,visit	I couldn't think of a better use for this land or a better group to run it. People can access good grown locally and be a part of it which is great for the community both locally and further afield. Used to live in the area and often pop back to bellahouston. I would love to see Locavore there.
208	22/05/2019	grow-more	This would be a great project and I cannot imagine any reasons for the council not to be fully behind it.
207	22/05/2019	grow-more,business	Alba trees in East Lothian run a similar large scaled operation for native tree saplings, if you haven't already I guess it would be good to collaborate with them on setting up the new business. They currently employ 80 staff to run a 13 hectare site, they are well established however and all of their service is now mechanised for efficiency which might not fit with locavores model...
205	22/05/2019	grow-more,volunteer	Good Luck!! Locally grown food should be supported as helps local economy and reduces carbon footprint
204	22/05/2019	grow-more,volunteer,gtg	This is the way forward - local growers, people learning how to grow food, low carbon-footprint. Excellent idea, hope it's approved and good luck!
190	22/05/2019	crow-more	This is absolutely awesome!
187	22/05/2019	grow-more	This is the future! Come on Glasgow!
185	22/05/2019	crow-more,volunteer,dtq	Locavore is an outstanding enterprise and should be fully encouraged.
183	22/05/2019	grow-more	This sounds like an amazing project that will benefit local communities in a number of ways. Really positive and exciting news!
182	22/05/2019	grow-more	Locavore are already doing great things to promote low carbon food and have a positive impact on their local community too. Taking over this site will allow them to continue to do this and increase their positive impact.
178	22/05/2019	grow-more	Happily travel to use this facility Locavore already benefits the community with the provision of fair work and training. The social enterprise is leading the way in developing a more sustainable food network. Use of this site would provide a fantastic opportunity to expand on this.
170	22/05/2019	grow-more	This is fantastic to see - keep up the good work! Sharing your experience along the way would be good. I'm a member of another group hoping to re-wild areas owned by the council.
168	22/05/2019	crow-more	This will benefit the whole city
166	22/05/2019	grow-more	I would also like to see this site developed and used for the benefit of the citizens of the city.
164	22/05/2019	crow-more	I've been a Locavore customer for about 3 Years and I believe what they are doing is amazing. We should encourage these types of businesses in order to have a better and healthier life.
161	22/05/2019	grow-more	This looks like a fantastic opportunity for Glasgow to access even more locally grown produce.
158	22/05/2019	grow-more	This will help our city tackle the climate emergency by cutting food miles, and local jobs will be created.
145	22/05/2019	grow-more	I'm a supporter of social enterprise in all its forms, it's inclusive and promotes environmental goals, crucial in a time of climate emergency.
144	22/05/2019	grow-more	I am unable to commit to being part of the project but 100% support locally produced good and would love to purchase more organic food locally
142	22/05/2019	crow-more	Perhaps there will be a possibility of groups to volunteer, maybe those with mental health problems or teenagers needing a focus in their life.
131	22/05/2019	grow-more	Loads of ideas! Keep up that great work, nothing like home grown tasty food! ☺
129	22/05/2019	grow-more,volunteer	Amazing work! With this I feel I'm witnessing a sustainable food revolution!
127	22/05/2019	crow-more	Would be great to do this kind of thing all over Scotland. Good luck!
123	22/05/2019	grow-more	Locavore are awesome and really help the community around them. This can only bring vibrancy to the site and an environmental win for the council!
120	22/05/2019	grow-more	
102	22/05/2019	grow-more	

pledge-support-for-locavores-be

99	22/05/2019	grow-more,volunteer	Keen to see this wasted asset revitalised by local growers working in environmentally friendly ways that will support the local community. Glasgow has an obesity problem and paisley road west hosts hundreds of take aways - this plan could offer a local, cheap, healthy and active alternative that is much needed Good luck! Hope it goes through. ☺ This is an excellent initiative and has the scope to cater for a wide range of sustainable and regenerative practices.
97	22/05/2019	grow-more	
96	22/05/2019	grow-more,business	The inclusion of education as well as food produce can only have a positive impact on the local and wider community. It would be an example which could then be replicated throughout Glasgow and surrounding areas. This sounds like a fantastic idea. Eating habits in the UK are pretty poor, with many young (and old) not knowing where their food comes from. With the increasing consumption of pre-made ready meals & fast food, and the decline in home-cooking, it's becoming more and more important to demonstrate how easy it is to grow basic food crops. This would be a wonderful opportunity to not only grow food, but to grow young minds! I think it would be amazing to be able to educate young people at a facility like this in Glasgow. I firmly believe that for it to work properly, it has to be given the security of knowing that it is a long term project. I think it would be great to see the site used... it would be good to know more about plans for growth, community guidance etc. There is a v successful allotment in Bella but difficult to access. I would be interested to see how the project could actively involve the local community both in management skills and as a resource for schools/ local groups. Good luck guys. This is a great idea.
85	22/05/2019	grow-more	This is a great plan with a huge beneficial reach to the local community. Cant wait to get involved some how. Its a great step towards a local organic and ecologic sound food community. I am impressed with what Locavore is doing so far in the southside community. This is a great opportunity to maximise their potential and contribute significantly to social and environmental issues.

79	22/05/2019	grow-more,volunteer	Good Luck! An amazing idea. I'd like to see Scotland as a world leader in this. Small and large projects to use all available growing spaces for food and beauty. I'm excited to see how this is going to develop. Wonderful idea. This is a fantastic idea, the more control we have over where our food comes from, the healthier we'll be, the safer we'll be and the more secure we'll be in the longer term. With the horrific prospects looming of chlorine-washed chicken, antibiotic-filled meat and private healthcare, it's now more important than ever that we look after our health, both collectively and as individuals. When food is growing for nutritional and health reasons instead of profit reasons, everyone is a winner. Well done Locavore, I'm enjoying watching you grow. Glasgow needs this now, but even more importantly (in my opinion) today's children will inherit all of this, and will have a better idea of how to grow food than the previous generation. Everything seems to be going downhill fast, and without initiatives like this I think a lot of us would be despairing. The skills that could be developed on this site would be invaluable for many years to come and locally grown food is in short supply. This is a very exciting development and would surely boost community action all over Glasgow! This would be a brilliant thing for the Southside and Glasgow as a whole. I live on the west side and we have nothing like this here, this kind of project may inspire others in different areas of Glasgow to do something similar, grow their own or buy from local growers. I hope this takes off! I'm on the waiting list for an allotment with current estimate of 10 years. This would be great. Brilliant transfer of assets, to grow food!!! :) x power to you all!!! :) x So I can receive a veg box! Not just to support local business, but the local environment and local families too. There is no real downside to this, make it permanent and watch it flourish! A perfect opportunity for Locavore to grow their community business and utilise an abandoned space.
