Subject: Cathkin Park

I have seen and read the documents for the Asset Transfer request of Cathkin Park by The Jimmy Johnstone Academy.

There is no information about how the natural and wildlife aspect of the park will be effected. It is also not clear whether it will remain an everyday free access public park..

The park is an essential green space in-between busy, polluted roads.. It is a pocket of healthy, woodland air for the local community .. it provides footpaths through nature and is a well-established wildlife habitat.

Can you assure the local community this 'everyday public access to the natural environment' will remain in place for the foreseeable future?

Will all the trees remain ?

Will the public footpaths stay in place?

Will all the green landscape remain as it is now ?

Yours faithfully.. a concerned local resident.
