Subject: Cathkin Park

I was shocked to here that Glasgow city council is debating to restrict public access to Cathkin park. I am a youth in this neighbourhood and currently use the space daily and have done for many years as do my friends and family. I think it is great for balancing study and health both physical and mental, as it is beneficial to have a green space so close to either have some time out or exercise. Will I still be able to use this space freely? I hope the council will be able to keep this space open to the people of Glasgow

Yours sincerely,
