Subject: Cathkin Pavilion and MUGA

Dear Clare Malloy,

I am strongly opposed to the use of this space as a football academy .

I am a long term resident of Mount Florida and have been using this space for running and dog walking with my children for years. There is plenty of provision for football training in this area and I have not observed any use of this football group by local communities such as the Roma community.

It also has a considerable amount of wildlife and is frequented daily by local residents enjoying the woodlands and green space .

I would be far more supportive if anything about this proposal looked like it would benefit the community with some investment in the glaze track and surrounding steps which could then be used for athletics training with a high degree of accessibility.

It looks like another money making venture at the expense of our local green spaces and available to only those with money and an interest in football .

Please consider .

Thanks,
