

How to install iOS Updates / Back up your iCloud:

1. If you notice a notification / message or red dot in Settings please DO NOT ignore. Tap on Settings.

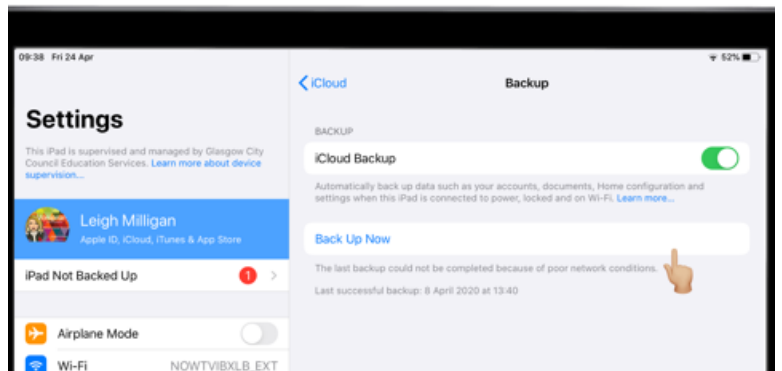

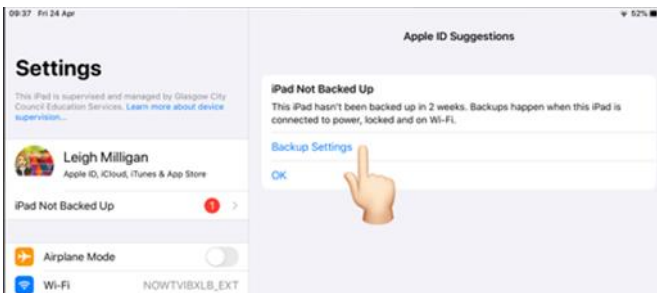

2. Tap on iPad Not Backed Up.

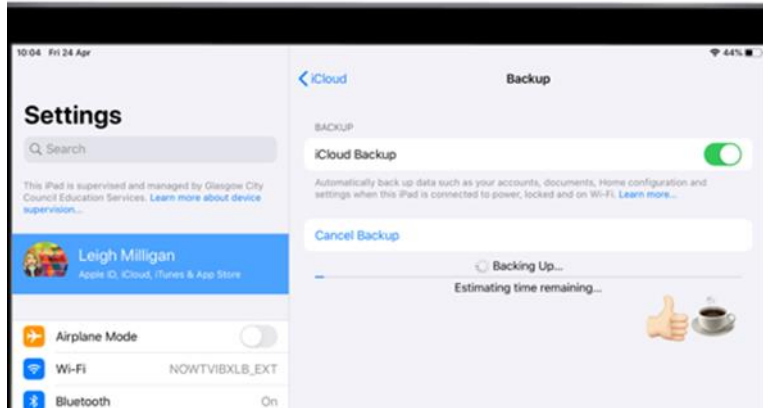

3. Tap on Backup Settings. If you tap OK, you will need to go back into Apple ID > iCloud > iCloud Backup > Backup Now

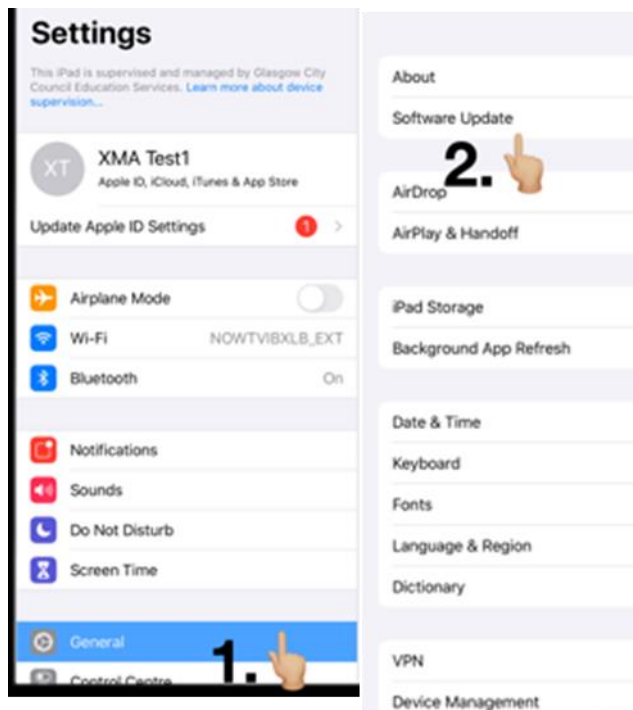

4. Tap Back Up Now. Make sure you have 50% charge or are plugged into power & have WiFi connectivity. Tap to enable.

5. Depending on how much you have saved, will depend how long this takes but if you do this regularly, it shouldn't take long.

6. Once Backup is complete, you can install the iOS update. We recommend you check once a week. From Settings go to General > Software Update.

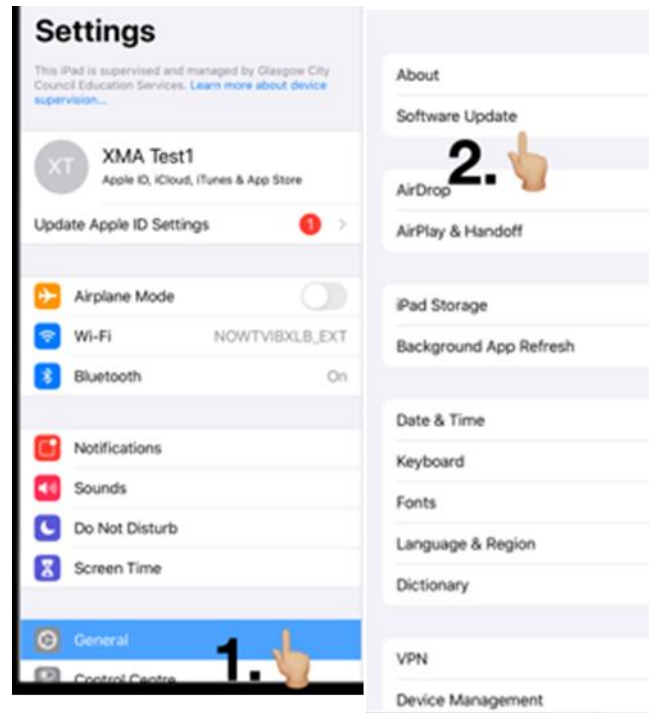

Installing iOS Updates:

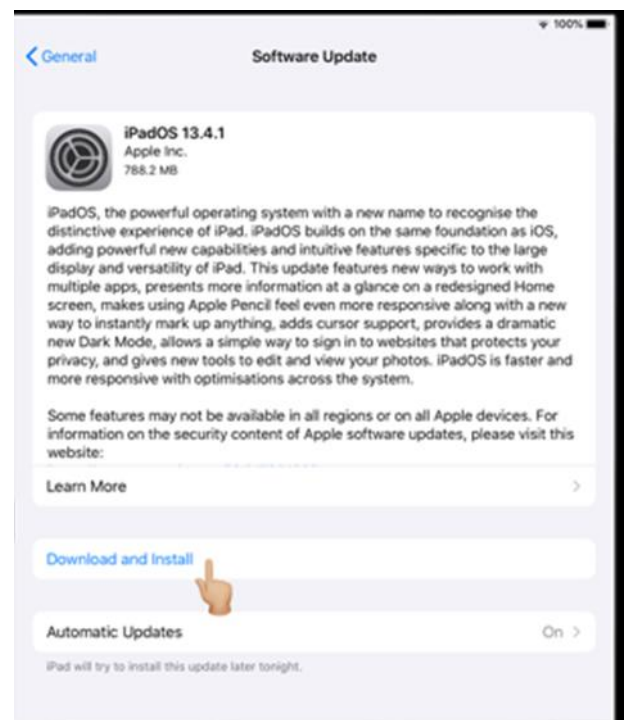

7. OR if you have come back into your Homescreen, tap on Settings.

8. Tap on General > Software Update. This is how you can also check if there is an update available.

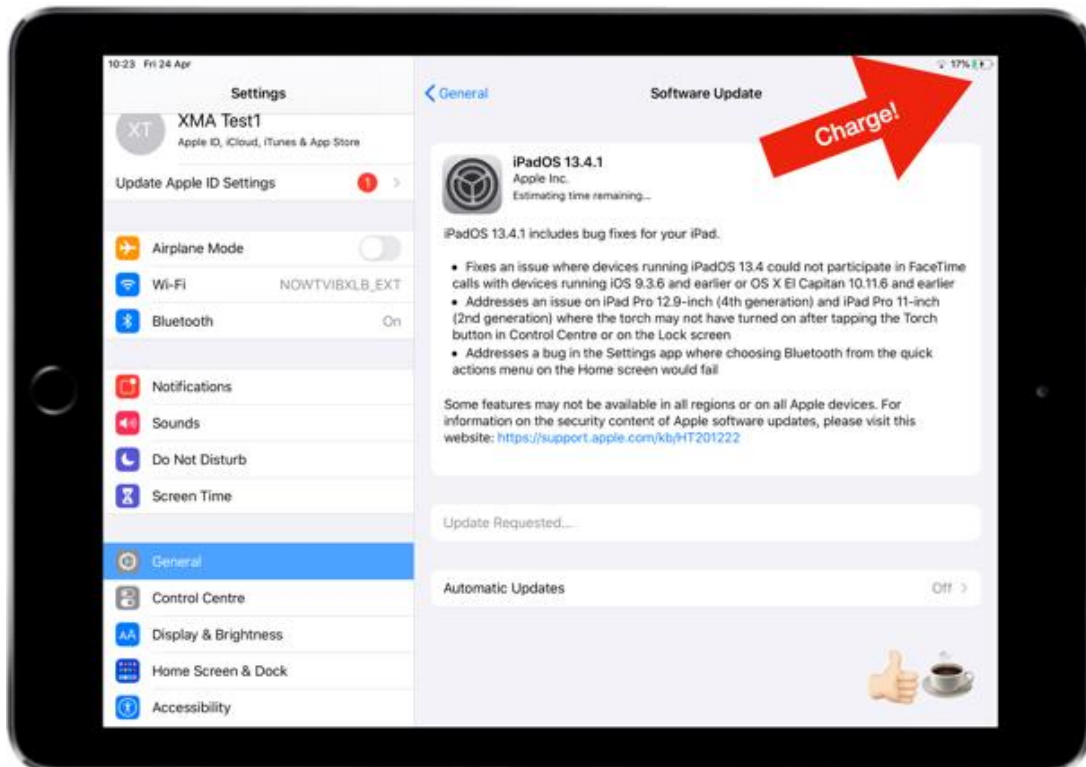

9. If there is a Software Update, tap on Download & Install.

10. Enter your Passcode (6 digit PIN) & the Update Requested message will show. Depending on your internet speed, this might take 5-20 mins.

11. Again, make sure you have enough charge & good Network signal to complete the iOS update.

12. Your iPad will switch off & restart. You can check your iOS is up to date, by going to Settings > General > Software Update & Check for Updates.
